Floor plans can provide a high level of visual information that words or photos cannot, including:

- Layout and sizes of all rooms, spaces and levels
- Room adjacencies and circulation flow of the home or building
- Locations of walls, windows, stairs, bathrooms and fixtures
- Orientation on site for sun angles
- Other exterior site features such as decks, porches and patios

Cape Cod Property Visuals can further customize your Floor Plans by adding Color and Furnishings to create an even more realistic impact and scale to your listing. This enables more visual understanding of the spaces and yields greater confidence for the client to purchase or rent the property!

Cape Cod Property Visuals specializes in creating high quality Floor Plans to best market your Real Estate listings for:

- Single-family Homes
- Condominiums
- Commercial Properties
- Vacation Rentals

Your goal is to find the right client for your property! An informed, educated consumer is always your best customer.

Adding Floor Plans to your property listing package gives you and your clients the detailed information they want and need to make informed decisions.

All Floor Plan fees include onsite measurements, square footage calculations and production of high-quality Floor Plans designed to meet your requirements.

You may choose to customize your Plan with additional enhancements including exterior features such as basic shrubbery, driveway, walkway, deck, patio or terrace on the Ground Floor Level.

Floor plans can be used for web, e-mail or with your printed marketing package and are available in several format choices.

Our turnaround is usually within 2-3 days and we'll do our best to meet your next Open House!

Please visit our website for a complete pricing list which includes your final approval and total satisfaction!
